

Academic Projects Built by Erland Receive AIA New England Design Awards

Burlington, Massachusetts –

Erland Construction is proud to announce that two academic projects on which it partnered with area architects were named at this year's American Institute of Architects (AIA) New England Design Awards, hosted by the Boston Society of Architects/AIA.

Beaver Country Day School's 40,000 square-foot Research + Design Center, designed by NADAAA, received an Honor Award at the recognition ceremony held on October 12. Beaver Country Day School partnered with Erland and NADAAA to transform its library building into a state-of-the-art research and design center for innovation equipped with the latest technology to meet the needs of its students and faculty.

The Snyder Center at Phillips Academy designed by Perkins+Will was awarded a Citation for Restraint. Phillips Academy teamed up with Erland and Perkins+Will to complete the new 98,800-square-foot athletic facility which includes a 200-meter indoor track, 4 multi-use tennis and basketball courts, a 12-court squash center capable of US Squash tournament play along with a range of spaces dedicated to athletic training, coaching and wellness. To increase sustainability on campus, the design and construct of the Snyder Center focused on utilizing energy efficient elements everywhere possible. As a result, the building received LEED Platinum certification.

"We are thrilled for our architect partners that received these distinctive industry recognitions," said Scott Bates, Academic, Corporate, Commercial Group Manager. "The collaborative effort and teamwork put forth by each project team is truly deserving of these awards. We value our relationships with both NADAAA and Perkins+Will and look forward to partnering again in the future."
